ABDULLAH KHALED FAWZI

Backend & Full-Stack Web Developer · Go · Node.js · Docker · Linux

Cairo, Egypt · +20 106 827 3380 · Abdullahkhaledfawzi@gmail.com Portfolio · GitHub · LinkedIn

Profile

Backend-focused developer with a full-stack range and a strong eye for frontend design. I build HTTP servers, REST API integrations, CLI tools and containerised services in Go and Node.js, and have shipped 15+ projects, all public on GitHub and showcased in my portfolio. I bring a customer-facing background that taught me to listen closely, communicate clearly and solve problems under pressure. Open to full-time and part-time roles.

Technical Skills

Languages: Go (primary), JavaScript / Node.js, HTML, CSS; Python and SQL basics

Backend: REST APIs, HTTP servers, microservices, routing and middleware, JSON, concurrency with goroutines

Frontend: Responsive UI design, server-side rendering, dynamic search and filtering

DevOps & Tools: Docker, Linux / CLI, shell scripting, Git, GitHub, code review

Core: Algorithms, data structures, test-driven development, problem solving

Selected Projects

Groupie Tracker · Go · REST API · Server-side rendering

Web app that consumes a RESTful API to display, search and filter artist and event data, with a clean responsive interface.

Forum · Go · SQL · Docker

Full web forum with user authentication, posts, comments and categories, backed by a relational database and containerised with Docker.

Lem-in + Visualizer · Go · Graph algorithms

Pathfinding program that routes ants through a colony using graph algorithms, paired with a visualizer that animates the result.

Clonernews · Go · JavaScript · REST API

Hacker News client that pulls live data from a public API and updates the feed as new items arrive.

Also built: ASCII Art web suite with Docker, Net-Cat concurrent chat server, Push Swap sorting. All projects and demos: abdullahkhaledfawzi.github.io/portfolio

Experience

Technical Customer Service Representative · 2023 – 2025 · Cairo, Egypt

Technical support for US and UK customers. Built strong active listening, clear communication, critical thinking and structured problem solving, which I now apply to debugging, teamwork and understanding user needs.

Education & Training

01 Coding, 01 Talent Academy · 2025 – Present

Project-based software engineering program (NextEra Education) built on peer-to-peer learning, code review and self-study.

B.Sc. Civil Engineering · Tanta University · 2018 – 2022

Graduation project rated Excellent; strong analytical and mathematical modelling foundation.

Languages

Arabic (native) · English (C1)
